L'Inkontro: the new place to eat this winter

L'Inkontro opens this winter 2023/2024. It's the new high-altitude restaurant on the Les Attelas slope in Verbier. Subtly blending Italian flavours with local Valais produce is the unique concept here. What better pairing for a day on the slopes?

The architectural concept at L'Inkontro is also a perfect pairing – of the traditional and the modern.

The site of the former Chalet Carlsberg has been preserved, but the building has been transformed to create a cosy atmosphere in which history blends with modernity. Every detail has been painstakingly devised to create a perfect fusion of tradition and innovation.

Step through the doors and you'll discover 4 distinct spaces, each designed to ensure you have a great time.

You'll be greeted with a warm welcome and the enchanting aroma of Italian cuisine from the moment you arrive. Right from the entrance, you will see and smell pizza being baked in our pizza oven. The scent is guaranteed to whet your appetite!

Le Kesto is the main restaurant in the building. This warm and welcoming eatery serves Italian cuisine

combined with local Valais produce – everything from antipasti to desserts. It's the perfect place to share food and make memories!

Le Komptoir showcases Italian flavours presented as delicious sharing plates. Don't miss out on the famous Trapizzino, a bold fusion of Roman pizza and street food. The menu also offers a variety of other antipasti, including a large selection of charcuterie and cheeses. Food is served from the bar.

The terrace is a haven of tranquillity with a large seating capacity. It's a great spot to sample some antipasti from Le Komptoir. This outdoor area features arena-style seating, allowing you to take in the breathtaking views of the Grand Combin massif.

L'Inkontro invites you on a culinary voyage that lets you feel the excitement of adventure without ever leaving its cosy warmth: the food and views will take your breath away! It is scheduled to open in December 2023.

Message from the CEO

Although the last winter season presented difficult snow conditions, we managed to pull through thanks to our new snowmaking equipment.

Without this equipment, the festive season would have been extremely challenging. The brand new facilities at Bruson have been very popular with users. The ski lifts also opened for the first time during the summer season, taking visitors to the summit of La Pasay to see its exceptional views.

As usual, we as a company continue to improve our infrastructure. There are no new cableway installations this year, but the north chairlift on the La Tzoumaz side has been upgraded and fitted with new, more comfortable seats. There have also been bigger changes elsewhere: Chalet Carlsberg, on the Les Attelas slope, has been completely revamped.

What's new: a QR code built into your KeyCard

Our KeyCards are getting a makeover this winter!

We've added a QR Code so you can easily top up your pass on your KeyCard without having to enter your card number.

What's more, by purchasing your pass online, you save time queuing at physical sales outlets.

Book your restaurant online

As of summer 2023, you can now book your table online at the La Pasay restaurant in Bruson and the La-Croix-de-Cœur restaurant between Verbier and La Tzoumaz! Also, starting this winter, the same booking system will be rolled out for Le Bistrot, 3023 and L'Inkontro.

Why book online?

- Saves time: Book online to avoid waiting on the phone or having to waste time going in person.
- Real-time availability information: Check the available times and choose the option that suits you best.
- Flexibility: Change or cancel your booking in a flash to suit your needs and your schedule.

A new lift at Le Châble station

This winter, there is a brand new lift that will make your journey to the Châble – Verbier gondola lift even more convenient. From now on, passengers arriving by train with luggage will be able to take the new lift to comfortably access the ski lifts.

This new lift will make life easier for all kinds of travellers, including cyclists, parents with prams and persons with reduced mobility.

Work is currently underway and the lift is scheduled to open in December 2023.

It now has more seating and offers even greater comfort, along with a host of new culinary specialities. The new restaurant here is called L'Inkontro.

The current geopolitical and economic situation around the world is creating a degree of anxiety. Inflation, medium-term economic uncertainty and armed conflicts are all raising a host of concerns. However, in the very short term, we hope that the "white gold" will arrive on cue, getting the new season off to the best possible start.

I look forward to welcoming you on the slopes of Verbier, La Tzoumaz and Bruson, and wish you all an excellent skiing season and the very best for the festive period!

See you on the slopes!

Laurent Vaucher - CEO

Ride in complete safety

Téléverbier and WEMountain are working together to raise awareness among off-piste skiers and to offer them appropriate training.

Did you know that in 90% of avalanche-related accidents, the avalanche is triggered by the victim or a member of their group?

Freeriding in Verbier is an exhilarating experience that puts you to the test as you hurtle down virgin slopes. However, it also comes with a certain level of risk, which is why it is essential to have in-depth knowledge of your own abilities and your environment.

Accident prevention is of the utmost importance – your fate is decided BEFORE the avalanche, not AFTER! WEMountain: more freedom, more fun and more safety! WEMountain has developed the first international mountain safety programme combining E-learning and T-learning (practical courses on the terrain). Get ready for the season and learn online from the comfort of your own home, at your own pace.

Fun on the slopes Copperfield School Funslope

In the La Tzoumaz – Savoleyres area, there's a fun park that's perfect for families.

It's great for when you want to do something different and discover new activities.

The park is designed to be fun and accessible to all skiers and snowboarders, whatever their skill level. Children can learn the basics of freestyle here while having fun on a slope full of obstacles and modules.

At the start, there's a starting hut similar to the one set up for professional races. A Bluetooth timekeeping system has been installed – it communicates between the start and finish. Getting started couldn't be easier: press a button and you'll hear 5 beeps (just like the ones you hear in the World Cup), then you start the stopwatch by passing through the starting gate.

At the finish, a screen displays your time along with the three best times of the day. This is the perfect opportunity to challenge your friends or just try to improve your own time.
